Skills

html5 Router css3 Vuex scss npm less webpack pug Bootstrap(4.x) Angular(beginners) EcmaScript(2015) vue.js(2.x) git Vue-adaptive design

Education

2006-2011, 3.5 years
Polotsk state University
(<https://psu.by>)
information technology
software

2018-2019
INTUIT (Free courses)
(<https://intuit.ru>)
basic JavaScript,
HTML, CSS

2019 - now
GeekBrains (Free courses)
(<https://geekbrains.ru>)
advanced JavaScript,
HTML, CSS

2020 - now
ITVDN (Free course landing page)
(<https://itvdn.com>)
basic Pug, SCSS

Work experience

09/2018 - Now
Table of Mendeleev
(<https://mendeinfo.usite.pro>)
Administrator

12/2019- Now
Maybebaby project
(<https://www.geekbrains.ru>)
junior Vue.js developer

Portfolio

Chat

<https://github.com/IvanShavliuga/vue-chat>

Multi-user Chat for exchanging short messages using some html tags

Html5Css3LessVue.js (2.x)NpmWebpackEcmaScript (2015)GitAdaptive designOwn design

Example vue.js news portal

<https://github.com/IvanShavliuga/vuejsnews>

News portal using vue technologies .js and css, bootstrap. This project is a simple social news network. The project was created specifically for self- learning. Implemented groups, users, news feed, the ability to edit material and create groups, as well as send messages, put likes, comments and reposts. I will be happy if you find errors in the code.

Example vue.js tasks list and timer

<https://github.com/IvanShavliuga/vuejs-timer>

task list and timer vue component

Html5Css3ScssVue.js (2.x)NpmWebpackEcmaScript (2015)GitAdaptive designOwn design

Example vue.js mail app

<https://github.com/IvanShavliuga/vuejs-mail-app>

Just a project for self-learning vue.js technology. Development of a multi-user mail application (only frontend parts) for your own needs and learning vue.js for further professional growth as a specialist. The project must switch between users and be able to add new ones. It should be possible to send messages to spam, and forward messages between users.
